

Wall Charger Acefast A1 PD20W, 1x USB-C (black)

Ref: 6974316280033

Wall Charger Acefast A1 PD20W, 1x USB-C (black)

Acefast A1 PD20W USB-C Power Charger (black)

The charger allows you to quickly charge your devices with PD 20W, QC 3.0, AFC and FCP. The lightweight and handy design allows for convenient storage and transportation. Multi-level protection protects the charger and the connected device from damage. It will be perfect for traveling, thanks to its 100-240V voltage.

Short charging time for your device

The product supports 20W Power Delivery, Quick Charge 3.0, Samsung AFC and Huawei FCP fast charging protocols. It only takes 30 minutes to power 58% of the battery on an iPhone 13 - as much as 3 times faster charging than the original charger. What's more, the smart chip selects the right amperage for the connected device, while preventing overcharging.

Small and handy

The charger will be a great companion when traveling. The charger's compact size and extremely lightweight design make it easy to transport and store. You can easily fit it even in your pocket! Acefast mains charger supports voltage 100-240V, so you can use it in different countries without any worries.

Durable and safe

You don't have to worry about the charger overheating! The product is characterized by excellent heat distribution. In addition, thanks to high-quality PC plastic, it is resistant to operation at high temperatures. The accessory is also protected against overheating, short circuit, overcurrent and overvoltage.
