

Wireless induction charger Joyroom JR-A23, 15W (black)

Ref: 6941237125392

Wireless induction charger Joyroom JR-A23, 15W (black)

Joyroom JR-A23 wireless inductive charger, 15W (black)

Conveniently charge your devices with the Joyroom wireless induction charger! JR-A23 is distinguished by its maximum power of 15W and wide compatibility. Thanks to its multi-level protection, using it is completely safe. It allows you to charge phones in a case if their thickness does not exceed 8 mm.

Smart fast charging

Forget about the long waiting time for your phone to charge! The product allows you to charge your devices stably and quickly. The charger supports 15W / 10W / 7.5W / 5W fast charging. In just about 10 minutes you will charge your iPhone 12 to 12%!

Lay down and charge

You don't have to take the case off your phone to charge it. The charger has incredible sensitivity and allows charging in a case with a maximum thickness of 8 mm. What's more, your smartphone will charge regardless of its position.

Wide compatibility

Whether you own an Android or iOS phone, you can easily charge your smartphone with the Joyroom wireless charger. It is compatible with the iPhone 13/12/11, Samsung Galaxy S10+/S20 Plus, Huawei P40 Pro or Xiaomi 10, among others.

Multi-level protection for your device

The built-in intelligent cooling system allows for more efficient heat dissipation. In addition, the surface of the charger does not overheat during operation. A number of protections effectively protect the device from overcharging, overvoltage or short circuit, among others. What's more, the charger intelligently recognizes the devices it is supposed to supply with energy - it will automatically shut down if it detects foreign objects.
