FM transmitter for Joyroom JR-CL18, 2x USB + USB-C, 30W (sil

Joyroom JR-CL18 car FM transmitter, 2x USB + USB-C, 30W (silver).

Comfortably play your favorite tunes and instantly charge up to 3 devices at the same time! The Joyroom FM transmitter provides uninterrupted and fast signal transmission, thanks to Bluetooth 5.3. It allows you to safely talk on the phone while driving and offers high-quality sound while listening to music. It is fully compatible with memory cards and AUX-enabled devices, so you can use it even in older cars without any problems.

Reliable signal transmission

The device uses the latest Bluetooth 5.3 technology, which guarantees a stable and instant connection. Pairing the transmitter with the selected device is extremely easy and takes just a second. What's more, it will automatically connect to the most recently used device when you get into the car, and the sound will resume where it was previously paused.

Talk without interruption

The JR-CL18 features an enhanced microphone that accurately picks up your voice from all directions, so you can be sure that your caller will definitely hear what you're saying. The built-in microphones are equipped with innovative CVC 8.0 noise cancellation technology to effectively block outside sounds.

Many possibilities

You can easily mount the product in the ventilation grille, so you can easily operate the transmitter while driving in the car. Use the center button to answer a call or turn on the voice assistant without worrying about pressing the wrong button. What's more, thanks to 3 USB ports, you can charge up to 3 devices at the same time.
