

Car Charger Acefast B5, 101W, 2x USB-C + USB, OLED (black)

Ref: 6974316281436

Car Charger Acefast B5, 101W, 2x USB-C + USB, OLED (black)

Acefast B5 car charger

Charge your devices on the go and save precious time. This will be helped by the Acefast B5 car charger, which is equipped with two USB-C ports and one USB-A port. The device is distinguished by its 101-watt power output, plus it has an easy-to-read OLED display that provides convenient access to information on charging parameters. It also has the advantage of broad compatibility and support for many popular fast charging protocols.

Express energy restoration

The Acefast B5 car charger stands out with a power output of 101 watts and can renew the power of a 13" MacBook Pro in about 2 hours. What's more, thanks to its three ports, you can charge your laptop, tablet and smartphone at the same time, and the built-in chip ensures optimal power sharing between your equipment. The B5 is compatible with such fast charging protocols as PD3.0, QC4+, SCP and many others.

High level of protection

The Acefast B5 is equipped with a number of protections, so you don't have to worry about overheating, overcharging, surges or overcurrent. What's more, the charger has a digital OLED display that provides real-time information about the charging parameters on each port. The product also has the advantage of being compatible with 12V-24V input voltage, so the charger will work well in a car,

truck or SUV.

Thoughtful design

The Acefast B5 car charger stands out not only for its efficient operation, but also for its stylish design and carefully engineered construction. The product weighs less than 100 grams and sits perfectly in the cigarette lighter socket, moreover, it perfectly dissipates heat and is scratch-resistant. The special finish is not only flame resistant, but also looks extremely elegant.
