

### Wireless inductive charger Choetech T524-S, 10W (black)

Ref: 6971824970166

Wireless inductive charger Choetech T524-S, 10W (black)

Choetech 10 W Fast Wireless Inductive Charger (black)

Instantly charge your smartphone and save time! The Choetech 10 Watt Fast Wireless Induction Charger is compatible with many popular devices and features a wide charging cradle that also allows horizontal charging and enhances the convenience of using your phone. The device has LED backlighting and non-slip features, and its tilt angle reaches up to 60°. The use of the charger is completely safe.

#### Wide compatibility

A huge advantage of the Choetech inductive charger is its wide versatility. With its help you can charge Samsung models with a power of 10 watts: Samsung Galaxy S10E/S10/S10+, Note 8/Note 9, S9/S9+, S8/S8+, Note 5, S7/S7 Edge, S6 Edge+ (an appropriate adapter is required to support QC 2.0 or QC 3.0 fast charging technology). With the power of 7.5 watts you will charge iPhone models: 11 Pro/11 Pro Max, 11, XR/XS/XS Max, X, 8/8 Plus. On the other hand, standard 5 W charging is possible with Qi-enabled devices, such as the Samsung S6/S6 Edge.

#### Fast charging

Using the Choetech wireless induction charger will reduce the time you have to wait until your phone's battery is charged. 3 hours and 14 minutes is the time it takes to fully charge the Samsung Galaxy 10. With other chargers, this time would increase to 3 hours and 45

minutes. The iPhone X model will be charged in 3 hours and 40 minutes - using standard chargers would extend this time to about 4 hours. The Choetech charger shortens the charging process by about 30 minutes. Forget about the long wait!

#### Great comfort of use

Thanks to two high-quality induction coils, the product has a wider charging base, which allows you to charge a device located both vertically and horizontally. This allows you to use your phone comfortably even while charging. You can comfortably watch movies, devote yourself to reading or gaming. The tilt angle of the charger is 60°, which further increases the convenience of use. If the thickness of your phone's case does not exceed 4 mm, you do not need to remove it from the device before charging. However, it is necessary to remove any magnetic or metal parts.

#### Even more conveniences

The non-slip silicone parts of the cradle ensure that the charger stays firmly in place. So you don't have to worry about the safety of your charged phone. The LED backlight that informs you of the device's operation features a very soft light, so it won't disturb your sleep while charging at night. The charger has a smart chip that provides multi-level protection against overcurrent, overheating, overvoltage and short circuit, among others.

#### Included:

Choetech wireless inductive charger

USB/Micro USB cable (1.2 m)

User manual

Manufacturer

Choetech

Model

T524-S

Power

10 W (max.)
