Smart Led Bulb Laxihub LAGU10S (2-pack) WiFi Bluetooth Tuya

Smart Led Bulb Laxihub LAGU10S (2-pack) WiFi Bluetooth Tuya

Do you want to create a special atmosphere in your home? The Laxihub LAGU10S smart LED light bulb will help you do that. It offers up to 16 million colors and 8 color scenes, so you can customize the lighting effects for many different situations. You can also adjust the brightness level from 5 - 100%, use the timer function and create schedules. The product also has the advantage of a dedicated app for convenient operation, as well as compatibility with Amazon Alexa and Google Home voice assistants.

Helps create beautiful memories

The Laxihub LAGU10S smart LED bulb offers up to 16 million colors, plus you can choose from 8 preset color scenes and adjust the brightness level. In this way, you can easily choose the right lighting and match it to a specific occasion. A romantic dinner, a party with friends or a movie night - the LAGU10S will work in any situation.

Comfortable operation

A dedicated TUYA app (compatible with Android and iOS) is responsible for convenient operation of the bulb. So all you need to do is connect to Wi-Fi 2.4 GHz and you will gain the ability to control the lighting without moving from the couch. That's not all - the LAGU10S works with Amazon Alexa and Google Assistant, so you can change lighting parameters with simple voice commands. The bulb also works with Arenti and Smart Life apps.

#### It will rock any party

Do you like to dance and often invite friends over? Equip yourself with a smart LED bulb and create a club atmosphere in your home. The Laxihub LAGU10S offers a function of synchronization with music, so it provides interesting lighting effects matching your favorite songs. This is a great solution that will guarantee a successful party and surprise your loved ones.

#### Schedule it to work

Did you happen to fall asleep with the lights on? With the Laxihub LAGU10S you can avoid it. The light bulb offers a scheduling function, so you can specify the hours when it should turn on and off. So you can program the bulb so that the light turns off in the evening and turns on in the morning when you wake up.
