Powerbank Baseus Bipow 30000mAh, 15W (white)

PowerBank Baseus Bipow 30000mAh, 2xUSB, USB-C, 15W (white)

Have you ever lost your phone at the worst moment? The PowerBank of this model can remedy this. When traveling, you just need to connect the device to the phone. Up to three devices can be charged simultaneously. Its capacity is 30,000 mAh and the output power is 15 W. It is equipped with an LCD display that allows you to monitor the power level of the PowerBank. It can be charged via the Type-C port and the Micro USB port. The device has 7 security levels.

High Capacity

The capacity of the power bank is 30,000 mAh. This means that it is able to charge the phone multiple times. Charging the PowerBank takes 8.5 hours. This is possible thanks to the power consumption of PD 5V / 3A. To monitor the display level of the PowerBank, there is a built-in display with information about the charge level in percent. The charging itself supports the Power Delivery 15 W standard.

Three input ports

The device can be used to charge three devices simultaneously. This means you can share your device with someone else who also needs to charge your phone. It can power most devices via USB-A / USB-C. The device can be used for Apple devices and phones with Android. It can charge wireless speakers, lamps, photo equipment and more.

Strength and Security

The product is resistant to breakage and damage due to the durable and resistant materials from which it was made. Its design includes world-class chips, reliable batteries, modern systems and a multi-layer coating that is designed to ensure safety. The device has numerous certificates after passing safety tests. It has 7 levels of security, sequentially, against overheating, discharging, overvoltage, overcharging, short circuit and electromagnetic field, which provides protection to the accessory and the phone. Additionally, the airline standards are also met.
