

## Mini wireless projector BYINTEK R19

Mini wireless projector BYINTEK R19

Ref: 725889899100

### BYINTEK R19 mini projector

Now you can comfortably watch movies and play games on the big screen. The BYINTEK R19 projector will make you feel like you're in a movie theater! It supports up to 4K resolution and is equipped with 2 Hi-Fi 5W speakers. It also offers Wi-Fi support, and thanks to Android 6.0 it allows you to freely use apps such as Netflix and YouTube. It stands out with a brightness of 700 lumens and provides multiple connectivity options (wired and wireless). What's more, the device displays up to 300" diagonal images.

### Large image - plenty of application possibilities

Create a theater room in your own room. The projector allows you to project a diagonal image of 30-300" from a distance of 1-6m. This means that you can successfully use it both in small and larger rooms, and even outdoors, for example, in the garden! What's more, you can hang it from the ceiling, set it up on a tripod or simply lay it on a table. It's ideal if you want, for example, to have a movie night with friends, watch a game with friends or give a presentation at work!

### Multiple available ports

Say goodbye to limitations. The projector stands out for its wide compatibility - you can easily connect your devices to it. You have at your disposal such ports as, for example, USB, HDMI, 3.5mm mini jack output and TF card slot. So you can comfortably play movies from external media or connect additional speakers to the projector. The R19 is also compatible with DVDs, computers, laptops, tablets,

smartphones, PlayStation 4 consoles and more!

#### Stunning picture

Vivid, richly detailed images and exceptional smoothness are just some of the R19 projector's strengths. The device uses a high-end DMD chip and supports technologies such as HDR 10 and MEMC. It also boasts a native resolution of 1280x800 and supports 4K (via HDMI cable). All this translates into fantastic image quality and crisp, natural colors. The projector also supports 3D (DLP-LINK), so you can almost literally be transported into the world of your favorite movie and feel like you're in the center of exciting events in your own room!

#### Android 6.0

Get even more enjoyment out of your entertainment. The projector supports Bluetooth 4.0 and Wi-Fi 2.4G/5G connectivity, and uses the Android 6.0 operating system. This means you can freely install the apps of your choice, use a web browser and watch movies available on platforms such as YouTube, Netflix and Amazon Prime Video. You also have the option to connect to the projector wirelessly. The device supports Miracast, DLNA and Airplay (via the happycast app).

#### User-friendly

The R19 projector is extremely easy to use. You will find a practical remote control included, which allows you to control the device remotely. Using it, you can not only turn it on or off, but also, for example, adjust the focus, set the volume, mute the speakers or switch to 3D mode. You no longer need to get up from your comfortable couch or chair every time! You can also operate the projector with the built-in buttons.

#### Reliable performance

Bet on the highest quality workmanship and get yourself a projector that will serve you well for a long time. The LED lamp of the R19 model is distinguished by a lifespan of about 30,000 hours, which translates into up to 10 years of use. The device also works surprisingly quietly - don't be afraid of annoying noise. What's more, an advanced MStar6A648 processor and a powerful motor are responsible for its smooth, reliable operation. At the same time, the projector is extremely light and handy - it weighs only 754g. So you can take it with you anywhere and arrange your own cinema wherever you want!

#### Get even more possibilities

This is not the end of the projector's possibilities! The P19 offers electronic zoom and focus, so you can easily adjust the image to your expectations. There's also a  $\pm 40^\circ$  vertical keystone correction option (automatic and manual). Thanks to this, you can easily correct any errors resulting from improper projector positioning! The device also has built-in 2 Hi-Fi speakers of 5W each, which will provide you with clear sound, saturated with details. It is also possible to power the projector with a car power adapter, available for sale separately.
