

## Aluminum Gimbal Protection Bar Sunnlyife for DJI Avata

Ref: 5905316140820

Aluminum Gimbal Protection Bar Sunnlyife for DJI Avata

Sunnlyife aluminum gimbal cover / bumper for DJI Avata

Make sure your equipment is properly protected. The Sunnlyife cover for DJI Avata effectively protects your gimbal when it collides with a tree or wall and takes the force of the impact on itself. It will be great especially for people who are just starting their adventure with drones. What's more, its installation as well as removal will not cause you any problem.

Durable and resistant

The bumper is made of durable and resistant aluminum alloy, so it will serve you for a long time. In addition, its lightweight design - only 5g, does not weigh down the drone in any way during flight, and also does not obstruct the lens (Note: the bumper may be visible at the maximum upward tilt of the camera). So you don't have to worry that it will negatively affect your videos or photos.
