

### Wireless remote switch SwitchBot-S1 (black)

Ref: 860038001710

Wireless remote switch SwitchBot-S1 (black)

SwitchBot-S1 wireless remote switch (black)

SwitchBot-S1 will allow you to turn any switch into a smart switch. It will also work perfectly in combination with pushbuttons. The device is very easy to install, and you only need one CR2 battery to power it. It is also possible to control it using the app or the SwitchBot Remote (not included). What's more, when you pair the product with the SwitchBot Hub Plus / Mini (sold separately), you can connect it to IFTTT, as well as control it with voice commands - it is compatible with Siri and Google Assistant.

Universal

Create a smart home for yourself that's comfortable to live in. SwitchBot-S1 works perfectly with most rocker switches and buttons. You decide how you will use it! For example, you can attach it to your coffee maker or use it to conveniently turn the lights on and off. The device also allows you to choose from 2 operation modes. Press mode works well for buttons, and Switch for switches.

Easy installation and configuration

Don't be afraid of problems with assembly and configuration of the device. It will not take you too much time! You don't need any tools for this - just stick the product next to the switch or button with a 3M adhesive sticker. What's more, you only need one CR2 battery to power the SwitchBot-S1, which you'll find in the kit. You also don't have to worry about needing to replace it quickly - the device's operating time is up to 600 days!

#### Remote control capabilities

Get the ability to control your switch remotely. Just use the SwitchBot Remote (not included) or a dedicated app! You can also combine the product with the SwitchBot Hub Plus / Mini, available separately. Once you do that, you'll be able to conveniently control selected devices with voice commands - SwitchBot-S1 is compatible with Amazon Alexa, Siri and Google Assistant. It also works with IFTTT and SmartThings, allowing you to connect more devices and create smart scenes.

#### Set timers and schedules

Adjust the operation of your devices to your schedule. The SwitchBot app allows you to set timers and schedules, so you can automate the operation of your selected appliances. Make the lights automatically turn off when you leave for work and the coffee maker start when you get out of bed. You'll find that living in a smart home is much more enjoyable!
