Smart remote control SwitchBot Hub mini

Ref: 850007706012

Smart remote control SwitchBot Hub mini

SwitchBot Hub Mini smart control panel.
Create for yourself a smart home where you live well. The SwitchBot Hub Mini smart control panel will allow you to connect your devices and products from the SwitchBot ecosystem, giving you the ability to automate their operation and control them remotely, such as with voice assistants or IFTTT. Create work schedules and smart scenes, enjoy convenient control and make your life easier!

Hassle-free setup
SwitchBot control panel is extremely easy to install and user-friendly. Don't be afraid of complicated configuration! Everything you need can be found in the app. The device is USB-powered and compact enough that you can easily carry it to your desired location and use it wherever you want. A Smart Learning feature is also available. Note: The SwitchBot Hub Mini only supports 2.4GHz Wi-Fi.

Enjoy remote control
With the SwitchBot Hub Mini, you can connect your devices to the Internet and create a real smart home. A lamp, an air conditioner, a TV? Now you have all your appliances in one application. Control them remotely and use the multitude of available functions - with just a few taps! The device works with a dedicated app, IFTTT and SmartThings, among others.

Voice control

Don't have a smartphone at hand, but want to turn on the TV? Or maybe you're just cooking and your hands are busy and you could use some extra lighting? SwitchBot Hub Mini rushes to help! The product will allow you to control selected devices with voice commands - it is compatible with Amazon Alexa, Siri and Google Assistant. Simply issue a short command to turn on the lights or turn off the air conditioner!

Tailored to your lifestyle
Not sure if you turned off the lights before leaving the house? You don't have to wonder anymore - just reach for your phone and turn off the lamp using the app! You can also create work schedules for your devices. Make the light turn off when you leave for work, the fan turn on before you get home, and the TV automatically turn on when it's time to broadcast your favorite show.

Many possibilities for automation
Using the control panel, you can not only connect your devices, but also automate their operation, creating smart scenes. Make a wireless switch turn on the coffee maker in the morning, and a system to control the curtains will automatically open the windows. Or connect the air conditioner to a temperature sensor so that it will spontaneously start up when the room gets too warm. The possibilities are almost endless!

In the box
SwitchBotHub Mini smart control panel
USB cable
3M sticker
User manual
Brand
SwitchBot
Name
Hub Mini
Model
W0202200
