Magsafe Mcdodo MC-7051 magnetic power bank, 20W, 5000mAh (wh

Magsafe Mcdodo MC-7051 magnetic powerbank, 20W, 5000mAh (white)

This small powerbank has a precision magnet built in, so it can also serve as a stand where your phone can safely charge horizontally or vertically. The high power (20W) means you'll get a full battery charge in no time while watching a movie or playing a game. The powerbank has a type C input, making it a universal device that you will charge without any problems.

Extraordinary pulling power

Automatic device identification allows you to quickly connect it to the charger, and the extremely strong magnet with 3300Gs induction power will keep your phone in place in any situation, even when there is a case on it.

Charge your device on your own terms

With the built-in foot, you can angle your phone both vertically and horizontally. The charging surface is small enough not to obscure the camera lens. This allows you to use all the options of your phone, while charging.

Don't waste time waiting

With a maximum wireless charging power of 15W and a wired charging power of 20W, you'll charge your phone to 50% in just 30 minutes. The McDodo MC-7051 is fully compatible with Apple, Samsung, Huawei, Xiaomi smartphones, as well as other QC-enabled

phones. The Powerbank additionally comes with LED indicators to show the level of charge, so you always know when to refill your Powerbank with the universal Type-C cable.

Safety is key

The product is equipped with a detector for other devices and protects against excessive power consumption or overheating. In addition, the built-in smart chip further protects against short-circuiting, as well as overcharging.

Manufacturer

McDodo
