Ref: 6921002617710

Selfie stick Mcdodo SS-1771, with lighting and remote contro

Selfie stick Mcdodo SS-1771, with light and remote control (black)

Take the perfect selfie or capture the entire landscape in one shot. The Mcdodo selfie stick unfolds to a length of up to 114cm, and will also work perfectly as a tripod. It also offers additional lighting, the brightness of which you can adjust. You will also find a small remote control included, which allows you to control the shutter remotely. At the same time, the selfie stick is incredibly light and handy - so you can always carry it with you!

Perfect for taking selfies

Get more options and create spectacular shots from original perspectives. Selfie stick Mcdodo will help you do it! The accessory allows you to adjust the length in 7 steps from about 20-114cm - so you can easily take a perfect selfie against a beautiful landscape or capture a group photo with your friends. Now everyone will fit in the frame!

Built-in tripod

The selfie stick is equipped with fold-out legs, which means it can also act as a tripod. You will successfully use it, for example, when taking photos from greater distances, it will also come in handy when recording vlogs or tutorials. High-quality aluminum and zinc alloys were used to make the accessory, which, combined with the improved design, makes the tripod more stable and durable.

Additional lighting

You don't need to carry extra lights with you anymore. With Mcdodo your photos and recordings will look perfect in almost any conditions! The selfie stick will provide you with additional lighting to effortlessly improve the quality of your shots. There are small lights on both sides of the phone holder, so the light will always be directed in the right direction. A 9-stage brightness adjustment is also possible.

Swivel phone holder

Position your smartphone at any angle and get a unique perspective. Selfie stick is equipped with a specially designed holder - you can rotate it 360°. Now you can easily position your phone both vertically and horizontally! The accessory is compatible with smartphones with a diagonal of 3.5-6.7", which means that it will easily handle most devices.

Improved design

The Selfie Stick weighs only about 194g, and when folded, it takes up so little space that you can always have it handy - it will easily fit in your bag or backpack. Take it on your next vacation and take lots of great photos! The accessory was created from high-quality materials, so it is very durable. What's more, there are non-slip pads on the legs of the tripod to give it more stability.

Wireless control

Feel like a professional model. Set your phone on the tripod, assume the pose of your choice and take a picture of yourself with a click - with Mcdodo almost nothing limits you! The selfie stick offers a small remote control for wireless shutter control. The device features a range of up to 10m and provides a fast, reliable connection. It also features low power consumption, which translates into a long working time.
