Wood Moisture Meter Habotest HT633

Ref: 5905316141049

Wood Moisture Meter Habotest HT633

Habotest HT633 wood moisture meter

The Habotest HT633 meter allows you to measure both humidity and temperature. It is equipped with 7 settings, so you can measure different materials. The display provides access to the most important information, and the sensitive sensor is responsible for precise measurements. What's more, it allows you to change °C/°F units and automatically shuts off after a certain period of non-use to save power.

Multifunctional

The device has 2 tips that provide fast and accurate measurements - you'll use it for materials such as wood, concrete, plaster and brick. You can also measure humidity and ambient temperature with the Habotest HT633. The LCD display provides convenient access to information in almost any conditions, and low, medium or high humidity levels will signal with green, orange or red colors, respectively.

Rugged design

Habotest HT633 was created from ABS plastic, which means the device is resistant to drops, dust and water. What's more, the ergonomic design guarantees comfort in use, and a special measuring tip cover prevents cuts. You will also find a wrench in the set, which will make it easier to assemble/disassemble them.
