UV Filter PGYTECH for OSMO ACTION 3 (Professional)

PGYTECH UV filter for DJI Osmo Action 3

Create even more interesting footage and be prepared for varying lighting conditions. Designed with the DJI Osmo Action 3 camera in mind, PGYTECH's UV filter will help you achieve beautiful, clear images and vivid, natural colors. The accessory was created from high-quality SCHOTT optical glass and has been coated with a special coating that protects it from water, grease and scratches.

Professional UV filter

Now you can easily get stunning results even in difficult lighting conditions. The PGYTECH filter is equipped with a special coating that stops blue light and UV rays. This makes it ideal for recording in open spaces, such as by the sea. It avoids bluish or whitish images, allowing you to create sharp, clear images.

Top quality workmanship

The filter uses the highest quality optical glass, which has been subjected to repeated grinding and polishing. As a result, it is distinguished by a low refractive index and allows capturing the natural colors of the subjects photographed. The accessory is also coated with a special coating that makes it resistant to water, grease and scratches. This means that you will easily keep it in perfect condition! In addition, the frame of the filter was created from lightweight yet durable aluminum alloy.
