Parking heater HCALORY HC-A01, Diesel, 5 kW, Bluetooth (blac

Parking heater diesel + bluetooth Hcalory HC-A01 (black)

Enjoy pleasant warmth even on cold winter days. Diesel heater Hcalory HC-A01 will come in handy both at home and while traveling. Its fuel tank has a capacity of 5l, and it is also distinguished by its low combustion rate of 0.1-0.35l/h. It also offers a thermostat function and heats up very quickly - in just about 2 minutes! You can control it with the app or the included remote control. The device also has an LCD screen and is compatible with 12V vehicles.

Compatible and versatile

The Hcalory heater will be perfect for a variety of applications. It is compatible with most 12V vehicles - you will successfully use it in a car or an RV, for example. The device will also allow you to warm up at a standstill and make it easier to remove frost from the windows. With its help you can also insulate your tent or garage. The possibilities are really great!

Reliable operation - fast heating

The product uses volatilization technology, which means that the fuel is heated and then vaporized into gas by a ceramic spark plug. The device heats up in just about 2 minutes and stands out for its high efficiency. It is equipped with a large 5-liter fuel tank, which, combined with a combustion rate of 0.1-0.35l/h, guarantees a long operating time. What's more, the heater supports 3 ways of power supply - via a 220V AC outlet, cigarette lighter socket or battery.

For the sake of safety

Thanks to the intelligent control module, the heater stably maintains the temperature and power at the right level, and ensures the safety of use. It is effectively protected against overheating and short circuit. What's more, it uses Diesel fuel, which is less flammable than ordinary gasoline - so you don't have to worry about fire. The device is also environmentally friendly. It features low emissions, which means less pollution enters the air.

Easy to install - convenient to use

The device features a well-thought-out, integrated design, and is easy to carry with an ergonomic handle. It is also extremely easy to assemble and disassemble, so you can successfully use it in many different scenarios. With its help, for example, you can heat your car, and then dismantle it and use it to heat your caravan. It is also possible to open the heater - just like a toolbox.

Hassle-free operation

The HC-A01 heater is extremely easy to operate. For example, you can control it with the included remote control, which has a range of up to 100m. You also have a dedicated app at your disposal - the device connects to your smartphone via Bluetooth. Convenient operation of the product is also provided by the LCD display. Now you can easily heat up your car even before you get into it - perfect for cold winter mornings! The heater also offers voice prompts in 3 languages.

Intelligent operation

Customize the heater's operation to suit your needs. You can adjust its power in the range of 1.4-5kW, and the temperature in the range of 16-35°C. The device also offers a thermostat function. What it means. When the temperature drops below a certain value, the product will automatically start, and once it has heated the space to the desired level, it will spontaneously terminate operation. This ensures that your car or RV is always pleasantly warm!
