4-in-1 Thermal Aqua Peel Facial Panoramic InFace CF-07E faci

inFace 5in1 facial care device BF-06E (white)

Turn your home into a beauty salon and take care of your complexion with the inFace 5-in-1 facial care device. The BF-06E supports many useful functions, such as intermittent pulse therapy, vibration massage, RF therapy, ionic care, phototherapy, and also offers 2 types of compresses - cold and hot. There will be up to 5 modes and 3 temperature levels at your disposal. The product will allow you to significantly improve the condition of your skin and achieve satisfactory results. What's more, thanks to its IPX6 waterproof rating, you can use it without worry. The maximum working time of the device is about an hour.

Suitable for all skin types

The inFace device offers as many as 5 modes, so it will be great for users of different ages and skin types. Clean mode provides a deep cleansing of the face, so you can precisely remove makeup residue. The process is carried out using ions, vibrating massage, red light and hot compress. Another mode, Moisture, promotes the absorption of skincare ingredients and uses negative and positive ions, vibration massage with orange light, and a hot compress. Find out that you don't have to leave the house to give your skin professional care.

Maintain a youthful appearance

The inFace device also offers modes to keep your skin looking youthful. Lift mode helps firm the skin and slim the face. The process uses

intermittent pulse therapy with red light. Another mode - RF - helps reduce wrinkles and promotes collagen rebuilding using RF antibodies and orange light. The last mode - Cool - will allow your skin to feel relieved and soothed, absorb cosmetic nutrients and shrink pores. It uses a cold compress. Feel attractive with an inFace product!

Create a home spa

You no longer have to leave home to enjoy services that help you relax and provide satisfying results. The inFace device supports up to 9 functions, such as vibration massage, light therapy (red, orange and blue lights), positive and negative ion care, radio wave therapy, intermittent pulse therapy, and will allow you to perform both hot and cold compresses. Each of these functions will positively affect the condition of your skin and make you feel like you're in a spa!

3 temperature levels

Choose the most suitable working temperature for you from as many as 3 possible. The first working level reaches 38°C, voltage 70 V and frequency 1 MHz. It helps eliminate wrinkles in the eye area. The second option is a temperature level of 40°C with a voltage of 80 V. With this feature you will significantly smooth the skin in the forehead area. The last temperature level reaches 42°C with a voltage of up to 90 V - this mode of operation of the device helps to restore skin elasticity. As you can see - with inFace product you will take care of every detail!

Specially designed head

The head of the device was made with the utmost care and coated with titanium, which will not harm even very sensitive skin and will not adversely affect the nervous system. Thoughtful design helps stimulate subcutaneous tissues, rebuilding cells and collagen, so you will regain a vibrant appearance and eliminate unwanted wrinkles. Enjoy a flawless appearance with the inFace device!
