Ref: 6936857202349

Romoss RS1000 Thunder Series Portable Power Station, 1000W, 933Wh

Don't give up using the equipment you need, even during power outages. The Romoss RS1000 Thunder Series Portable Power Station features a capacity of 933 Wh and Power Boost drive technology with a power rating of up to 1000 watts. The housing of the device is made of durable and fire-resistant materials such as PC and ABS. The device supports PD 60W fast charging and offers an eye-friendly light that is adjustable within 90°. In addition, it is equipped with several ports, so it will be compatible with most of your devices.

The perfect travel companion

Going on a camping trip with your loved ones? Or are you planning a fishing trip or a mountain excursion? The RS1000 will prove itself in any situation! The device has several ports, such as AC, DC, USB-A or USB-C. It also enables wireless charging with up to 10 watts of power and also supports PD 60W technology, so you'll forget what a long wait is for your devices to be charged and ready for use again. In addition, the device stands out with a power rating of up to 1,000 watts and a capacity of as much as 933 Wh. Have the station always with you and be ready for any circumstance!

Robust design

The housing of the device is made of durable and fire-resistant materials, such as PC and ABS. The solution used made the device able to withstand pressure of up to 85 kg and is shockproof. It will not be harmed by a fall from as high as 1.2 meters. Moreover, the protective

cover eliminates the risk of sand or dust getting into the station. The product's dimensions are just 371 x 254 x 262 mm, and it weighs 8.24 kg.

Additional advantages

When designing the Romoss portable power station, every detail was taken care of. The device is equipped with a flashlight, which will make it easier for you to perform various activities after dark, or to call for help when needed. What's more, the RS1000 provides an eye-friendly reading light that will enable you to comfortably read books outdoors. You can freely adjust the illumination by up to 90°. In addition, powering the device is done efficiently using an AC adapter, car charger or solar panel.

Total safety of use

The Romoss station is distinguished by the BMS protection system and its use is completely safe. The device has received UL certification, which proves its high quality workmanship. You can freely power your devices without worrying about overheating, overloading or short-circuiting. The SoC display will inform you about the most important information about the device's operation, such as temperature or battery level.

Included:

Power station x1

AC adapter x1

Car charger cable x1

User manual x1

Manufacturer

Romoss

Model

RS1000

Capacity

933 Wh

Rated power

1000 W

Peak power

2000 W

Flashlight

1 W

LED

1 W

Resource

AC adapter (150 watts max) / Solar panel (120 watts max) / Car charger (60 watts max).

Ports

AC (3000 W max) x2 / DC (150 W max) / Car outlet (120 W max) / USB-A (18 W max) x3 / USB-C (120 W max) / Wireless charging (10 W max).

Operating temperature

-10°C to 40°C

Other

Flashlight, reading light, SoC display, protective cover, ECO mode

Dimensions

371 x 254 x 262 mm

Weight

8.24 kg
