TELESIN Universal Suction Cup Holder with phone holder and a

Adhesive suction cup mount for phones and sports cameras Telesin TE-SUC-012

With the Telesin TE-SUC-012 suction cup mount you will stably attach your sports camera or phone to a flat surface of your choice. The accessory is very lightweight, yet sturdy. It also offers 2 ball joints so you can freely adjust its position. The mount is compatible with most sports cameras and smartphones, and has a maximum load capacity of 10kg.

Adjustability

Adjust the position of the mount to suit your needs. The accessory is equipped with 2 ball joints, so you can freely adjust its tilt and 360° rotation. Now you can easily get the right angle for recording or position your smartphone to use it comfortably!

Exceptional stability

The mount is equipped with a specially designed suction cup that provides a stable, reliable attachment. Don't be afraid that the camera mounted on it will fall and be damaged! The accessory is also very easy to install and is distinguished by a load capacity of up to 10kg. It will meet almost any challenge without a problem!

Ref: 6974944460524

Wide compatibility

It doesn't matter what devices you use - with the Telesin mount you can easily prepare your best shot! The accessory is compatible with many sports cameras and smartphones. This makes it perfect for many situations! Note: for some cameras you will need to use an additional frame, which must be purchased separately.

Multiple uses

This practical accessory will be perfect for many different applications. For example, you can use it to attach a camera to your car and record your trip from an unusual perspective. The mount will also make it easier for you to use navigation. Want to comfortably watch a movie on your smartphone or take part in a video conference? Use the mount to stably attach your device to your desk!

Lightweight and durable

High-quality materials were used to make the accessory, which translates into its strength and resistance to damage. At the same time, the mount is extremely lightweight and handy. What's more, thanks to its foldable design, you can always have it at hand. Take it on your next trip and create plenty of original shots!
