

TELESIN Waterproof case for DJI Action 3

TELESIN Waterproof case for DJI Action 3

Waterproof case for DJI Osmo Action 3 Telesin OA-WTP-003

Capture the beauty of the underwater world. Created with the DJI Osmo Action 3 in mind, the Telesin waterproof case will allow you to safely submerge your camera to a depth of up to 45m and protect it from damage. The accessory fits the shape of the device perfectly, and thanks to the included anti-fog cartridges, it avoids vapor buildup on the lens. Now you can easily get perfect results!

Ref: 6974944460807

Reliable protection

The Telesin OA-WTP-003 housing is an almost indispensable accessory for diving or surfing enthusiasts. It allows you to submerge your DJI Osmo Action 3 camera to a depth of up to 45m, so you can freely explore the underwater world and record stunning videos. What's more, the product was made of high-quality materials, so it is very durable and can provide the device placed in it with effective protection from damage.

Comfortable use of the camera

Thanks to its well-thought-out design, the case perfectly fits the shape of the camera and allows you to use its buttons comfortably. In addition, the screen covers are made of high-quality PC plastic, which is distinguished by a light transmission of 95% and provides a clear, clean image in almost any conditions. The accessory is also very easy to install.

Create stunning shots

Don't worry about image quality deterioration when the camera is placed in the housing. The lens hood was created from high-quality tempered glass, which features high scratch resistance and allows you to achieve fantastic recording effects. The kit also comes with special anti-fog inserts that prevent water vapor deposition. So you can capture your underwater adventures in fantastic shots!
