

Headlight Superfire HL71, 500lm, USB

Headlight Superfire HL71, 500lm, USB

Ref: 6974760351815

Superfire HL71 headlamp flashlight

Ensure your safety and comfort after dark. The Superfire HL71 headlamp flashlight provides stable illumination with a brightness of 500 lm. It allows you to choose from 5 modes and adjust the position of the light. The flashlight will be perfect for many situations, such as small repairs, night hikes or bike rides.

A reliable source of light

The Superfire HL71 headlamp is equipped with the latest LED, which provides stable and even illumination. Its brightness level is 500 lm, so you can be sure to spot anything that stands in your way. It is also possible to adjust the tilt of the lamp in the range of 0-90°.

Tailored to you

The flashlight will work well in many different situations. By adjusting the light output, it allows you to illuminate both near and far objects. There are also 5 modes at your disposal, so you can easily match its operation to your needs. You can conveniently choose from Low, Medium, Strong, as well as Strobe and SOS modes.

Designed with different users in mind

The HL71 is exceptionally comfortable and does not cause discomfort even during hours of use. You also don't have to worry that the

flashlight won't fit your head - the adjustable headband allows you to adjust its size to fit any user's head. Its working time reaches 4.5 hours, and you can easily charge it with a USB cable (included) when needed. The charging itself takes about 4 hours, and you will also be informed of the charging status by a light indicator.
