Wall charger LDNIO A2425C USB, USB-C + USB-C cable

LDNIO A2425C USB, USB-C charger + USB-C cable

LDNIO A2425C not only offers instant device charging, but will also serve you as a night light. The charger is equipped with two fast charging ports (USB and USB-C). It is made of high-quality, wear-resistant materials and is also extremely lightweight and handy. It stands out for its wide compatibility, and thanks to the technologies used, it has managed to achieve multi-level protection for the charged devices.

Instant charging

The charger offers two ports - USB and USB-C, which support PD and QC 3.0 fast charging protocols. This allows you to charge two devices simultaneously with up to 20 watts of power! The built-in smart chip recognizes the connected device and automatically adjusts the energy supply to it to charge it in the shortest possible time. This allows you to significantly extend the life of your battery.

Built-in night light

The product is equipped with an LED lamp that emits a pleasant, warm light and can serve you as a night light next to your bed, for example. Just use the button to turn it on/off or adjust the brightness to suit your needs.

Wide compatibility

LDNIO A2425C accepts a voltage level of 100 - 240 volts, which means you can use it in almost any country without any problems, regardless of the network standard. The universal USB and USB-C ports support PD and QC 3.0 protocols, allowing you to quickly charge devices from almost all well-known manufacturers, and this will be facilitated by the included USB-C cable. What's more, thanks to its compact design, the charger will fit into any purse or backpack.

Robust design

High-quality materials have been used to make the charger. The housing is made of heat-resistant polycarbonate. LDNIO A2425C also offers multi-level protection for your charged devices, so you don't have to worry about overheating or overcharging.

Included:

AC charger

USB-C cable

□Manufacturer

□LDNIO

□Model
