LDNIO Bluetooth FM Transmitter C705Q 2USB, USB-C + micro USB cable

The LDNIO C705Q Transmitter is an ideal choice for people who want to be able to quickly charge their devices and listen to music in the car. It offers high-quality audio transmission over the radio band, connecting to the audio source via Bluetooth. What's more, it supports fast charging protocols and features an easy-to-read LED display. A micro USB cable is included.

High-end audio

Getting ready for a long car trip? Take the transmitter with you! Just put it in the power socket and connect it to your smartphone via Bluetooth 5.0, and you'll get music playback. What's more, the product also supports audio streaming of incoming calls, so you can safely talk on the phone while driving. You will also successfully pair it with a video recorder, camera or navigation.

High charging performance

The product features a powerful chip that allows you to quickly charge your devices via QC3.0, PD3.0, SCP, AFC, FCP and Auto-ID protocols. The maximum power of 43 watts ensures high efficiency of the charger, allowing you to replenish the energy of your devices in no time - even 3 devices at once.

More options

The transmitter has a built-in LED display that provides information on voltage and current while charging. An additional feature is the

monitoring of the car battery voltage. This will let you know when the parameter drops below 11 volts, which is a clear signal for replacement.
