

Temperature and humidity sensor for Broadlink RM4 mini

Ref: 6924826703751

Temperature and humidity sensor for Broadlink RM4 mini

Temperature and humidity sensor cable

Broadlink's temperature and humidity sensor cable is compatible with the RM4 mini and RM4 Pro remote control. By connecting it to the remote control, you can easily check the temperature and humidity of the room you are in. Made of high-quality materials, it is resistant to minor mechanical damage, breakage or abrasion.

Easy to use

Once the RM4 is properly configured, simply replace the regular cable with the Broadlink HTS2 sensor cable. As soon as it is connected, the app will show information about the ambient temperature and humidity level. From now on you can take care of the air quality in yours in a quick and easy way.
