

Cordless vacuum cleaner Viomi Cyber Pro

Cordless vacuum cleaner Viomi Cyber Pro

Ref: 6923185649748

Viomi Cyber Pro cordless upright vacuum cleaner

Make cleaning easier and keep the floors in your home spotlessly clean. Viomi Cyber Pro allows you not only to vacuum, but also to wet mop selected surfaces - it can easily handle even extremely stubborn stains. It stands out with a suction force of up to 12.5kPa, and its working time is about 40 minutes. The device also offers an automatic brush roller cleaning function. Operation of the vacuum cleaner is facilitated by a built-in LED screen, a dedicated app and voice prompts.

Your ally in the fight against dirt

Now you can deal with even extremely stubborn dirt in no time. The vacuum cleaner is equipped with a powerful motor and its suction power is up to 12.5kPa. Thanks to this, it instantly eliminates dust, crumbs, hair, dander and other waste. Nothing can hide from it! What's more, the specially designed brush allows you to thoroughly clean along walls and in corners. Make even hard-to-reach places sparkle with cleanliness!

Deals with stains

Find out that cleaning the floor doesn't have to require much effort at all. Viomi Cyber Pro is equipped with a special sprayer, so you have control over the amount of water you use. Don't be afraid of stains! An additional advantage of the device is a special scraper that removes dirty water from the brush roller during cleaning. You don't have to worry about contaminants getting back on your just-washed

floor!

Automatically cleans itself

You no longer have to get your hands dirty and waste time cleaning your vacuum cleaner's brush roll. Cyber Pro will take care of that for you! All you have to do is place the device in the included station and then press the appropriate button. When you do, the roller will be automatically cleaned and then dried. Forget about dirt and bad odor!

Even more convenient operation

The vacuum cleaner is equipped with an easy-to-read LED display that will give you convenient access to information. Among other things, it will notify you when the tank needs to be refilled and when the battery is low. A dedicated app is also available. The Cyber Pro also offers useful voice messages. You can also choose from 3 operating modes of the device (smart, sterilization, water suction).

Smart operation

Enjoy efficient and effective operation of the device. The vacuum cleaner is equipped with an advanced sensor, thanks to which it automatically detects the type and degree of dirtiness of the surface, and then intelligently adjusts the suction power and amount of water to it. As a result, the Cyber Pro ensures lower energy consumption and, consequently, longer operating time. It also reduces the frequency of filling the water tank.

Long working time

No more forced interruptions in cleaning to recharge the vacuum cleaner. The Cyber Pro model is equipped with a 4,000mAh battery that provides up to 40 minutes of run time. That's long enough to vacuum floors with a total area of about 200m²! This makes the device perfect for both small and larger apartments.

Larger water tanks

Be sure to always clean your floors with only clean water. The vacuum cleaner is equipped with 2 tanks - each with a capacity of 740ml. One is for clean water and the other for dirty water. This means you don't have to worry about dirt getting on the floor again! In addition, the large capacity of the tanks avoids frequent filling. The Cyber Pro also has special sensors to remind you when it's time to change the water.

Say goodbye to harmful bacteria

Create a clean and healthy environment in your home. The vacuum cleaner offers a sterilization mode, so you can wash your floors with electrolyzed water. This way you will get rid of the bacteria present in your apartment. Do you have a dog, cat, rabbit or other animal? Or does your child often play on the floor? With the Cyber Pro vacuum cleaner you will eliminate harmful germs and take care of the health of all household members!
