Smartwatch Mibro Watch GS (Greece)

Mibro Watch GS smartwatch (Product can only be activated in Greece)

Opt for a smartwatch that will make your daily life easier. The Mibro Watch GS will notify you of incoming messages and calls, offers up to 70 sports modes, and stands out with a battery life of up to 24 days. It also has built-in GPS. Its added advantage is a color AMOLED screen with Always on Display. The device can also monitor heart rate, sleep and blood oxygen saturation.

### Reliable, efficient operation

An innovative dual-core chip is responsible for the reliable performance of the smartwatch. Thanks to it, you can enjoy smooth and efficient operation of the device. The GS model is also distinguished by low power consumption, which translates into its long operating time. Also noteworthy is the built-in 2.5D GPU and a refresh rate of up to 60Hz.

### AMOLED Super-retina display

Enjoy bright, clear images, rich details and vivid colors - the smartwatch is equipped with a high-end 1.43" AMOLED display. If you wish, customize its appearance to your liking by choosing from the available dial designs or uploading your photo. The GS model also supports Always on Display, so you can check the time at any time without pressing buttons.

#### Built-in navigation systems

The smartwatch uses advanced navigation systems such as GPS, Beidou and GLONASS. This allows it to quickly and accurately record the routes you take. Enjoy every trip and rest assured that your device will not let you down. You don't have to rely on smartphone navigation anymore!

#### As many as 70 sports modes

Achieve peak fitness with Mibro. The smartwatch counts calories burned and measures distances covered, and lets you choose from 70 sports modes. Biking, running, or maybe rock climbing? You are sure to find something you like! After your workout, you'll also gain access to detailed information and statistics - just use the app. Track your progress and set yourself more goals to achieve!

#### Take care of your health

Now you can get to know your body better and react quickly to alarming symptoms. The smartwatch allows you to measure your heart rate and blood oxygen saturation, and supports sleep monitoring. By analyzing the information it collects, you will learn what habits are worth changing to finally start getting enough sleep. The device also measures stress levels and offers special breathing exercises to help you relax.

#### Many useful features

Someone is calling you and you just can't answer? Reject the call and send one of the default messages from the smartwatch! However, this is not the end of the possibilities of the Mibro GS. Among other things, the device allows you to remotely control your smartphone's music player and camera, and offers functions such as a calendar, stopwatch, alarm clock, compass, calculator and weather, for example.

#### Ideal for everyday use

Despite its large capabilities, the smartwatch is surprisingly lightweight - it weighs only 56.5g. The device is also extremely comfortable. It is also distinguished by its 5ATM water resistance, which means you don't have to take it off your wrist when you go for a workout, want to swim, intend to wash the dishes or leave the house in the rain. It's not intimidated by splashes or sweat!

#### Durable battery

The smartwatch is equipped with a durable 460mAh battery and stands out for its low power consumption. Thus, fully charged, it can serve you for up to 24 days with normal use or up to 100 days in standby mode. If you use GPS systems, the watch's operating time is about 15 hours. To charge the device, use the included magnetic cable.
