Toslink Audio Optical Cable Vention 5m (Black)

The Toslink Audio Vention optical cable is an essential part of any modern audio system. Allowing you to work seamlessly with a variety of devices. It offers an unparalleled audio experience. Protected against dust and oxidation, and what's more, it is characterised by exceptional durability and long service life. Made from the highest quality materials, it guarantees excellent sound quality.

User comfort

The Toslink Audio Vention optical cable is a highly compatible audio cable, ideal for anyone who values reliable and robust connectivity. It uses fibre-optic transmission technology to provide clear, undistorted sound of excellent quality. The digital audio signals it transmits are completely immune to electromagnetic interference, meaning that no matter the environment, the sound will always be clear and clean. In addition, the cable has a length of 5 metres, allowing for flexible positioning of audio devices at home or in the office.

Thoughtful design

The optical cable is a versatile tool, compatible with various devices such as TVs, games consoles (PS4/XBOX), DVDs or projectors. Made from the highest quality materials, it is characterised by exceptional durability and long life. In addition, its design protects against dust, ensuring long and trouble-free use. The cable's unique properties also include protection against oxidation, which further increases its lifespan.
