Earphones TWS Vention Elf E01 (white)

Bet on high quality sound. Equipped with 10-millimeter drivers, the Vention Elf E01 headphones deliver clear, natural sound and up to 7 hours of runtime on a single charge. Thanks to Bluetooth 5.3 technology, they guarantee a fast, stable connection, and IPX4 water resistance allows you to use them in the rain or on a workout without worry. You also get built-in touchpads for convenient song switching, stopping playback and more.

Reliable wireless connection

The headphones use state-of-the-art Bluetooth 5.3 technology, which provides faster, more stable transmission, a range of up to 10 meters, lower power consumption and greater resistance to interference. Forget about connection problems! The Elf E01s also offer very low latency at around 0.18 seconds. This makes them great for watching movies or playing games! What's more, you only need to pair the headphones with your chosen device once - they will connect automatically every time.

Tailored to you

Enjoy the comfort of your dreams. The headphones feature a lightweight, ergonomic design, so they fit perfectly in your ears and are very comfortable. You'll also find interchangeable eartips in 3 sizes (S, M and L) for an even better fit. In addition, the IPX4 water resistance allows you to listen to music during your workout or on rainy days without any problems. It doesn't end there - the

headphones connect to your devices independently, so you're free to use both at once or just one.

Hear every detail

Discover previously unknown details of your favorite songs. With 10-millimeter drivers with PU + PEEK composite diaphragms, the headphones can deliver rich detail and perfect harmony. Powerful, deep bass, clear mids and crisp treble - take your musical experience to a whole new level with Elf E01!

Listen longer, charge faster

Listen to music for as long as you want - your headphones won't discharge too quickly. Elf E01 can play your favorite songs for about 7 hours, and with the help of a dedicated case, you can extend this time to 21 hours. Now your playlists can accompany you even throughout the day! Charging the headphones won't take long - it only takes about 1.5 hours to charge them to 100%.

Even more convenient operation

Now just a few touches are all it takes to, for example, stop / resume playback, skip a song, answer a phone call, hang up or reject a call. The headphones are equipped with touch panels, so you don't have to use your smartphone every time. The Elf E01 is also compatible with the Siri voice assistant. Simply issue the appropriate command to play the song of your choice or call a friend!
