Earphones TWS Vention Elf E03 (black)

Discover even better sound quality. The TWS Vention Elf E03 headphones deliver fantastic sound thanks to 10-millimeter drivers and stand out with a long operating time of up to 6 hours. They support Bluetooth 5.3, which guarantees reliable signal transmission, and are also very light and comfortable. Their additional advantage is IPX5 water resistance, so you don't have to take them out of your ears when you exercise or it rains - they're not afraid of water drops or sweat.

More interesting sound experience

Your favorite songs have never sounded better. The headphones are equipped with 10-millimeter drivers with premium PU PEEK diaphragms, so they can deliver ear-pleasing mids, crisp highs and powerful bass. Enjoy great sound quality and feel like you're at a concert wherever you are!

Bluetooth 5.3

Fast, stable connection, a range of up to 10m, greater immunity to interference, better sound quality and lower power consumption - these are just some of the advantages of Bluetooth 5.3, which the headphones use. Also noteworthy is the low latency (about 0.05 seconds). Perfect synchronization of video and sound will allow you to play games and watch series without interruption! What's more, you only need to pair the headphones once with the device of your choice - later they will connect automatically when you open the

case.

They will prove themselves during conversations

Do you often chat with your friends on Discord? Or do you happen to make phone calls in noisy places such as the mall or a bus? Elf E03 headphones will work well in such situations too! They are equipped with state-of-the-art microphones and support advanced audio signal processing, so you and your callers can hear each other without any problems.

Dream comfort

Can't imagine a day without your favorite music? Now you can listen to your playlists for as long as you want - don't worry about discomfort. The headphones are very comfortable and lightweight - each weighs only 3g. They fit perfectly to the shape of your ears and will not fall out of them - even if you move a lot. In addition, the Elf E03 case has 4 LED indicators that will provide you with information about the battery charge level. It also offers a special hole where you can attach a lanyard.

Touch operation

Want to turn down the music or skip a song? You don't have to reach for your smartphone every time! The headphones are equipped with small touch panels, with which you can, for example, conveniently stop the playback, answer the phone, switch a song, activate the voice assistant or adjust the volume. Now you have all the functions you need at your fingertips!

Many hours of music

Uninterruptedly listen to music at home, at work, on a trip or during a train journey - the Vention Elf E03 headphones won't drain too quickly! Thanks to long-lasting batteries, they can play your favorite songs for up to 6 hours, and the included case allows you to extend this time to about 30 hours. However, that's not the end of the convenience! You only need about 10 minutes of charging to listen to music for another hour. You don't have to wait too long!
