

Car charger Joyroom JR-CL03 5-Port USB (black)

Ref: 6941237122353

Car charger Joyroom JR-CL03 5-Port USB (black)

Joyroom car charger JR-CL03 5xUSB (black)

Do you often travel by car with your family? Or do you happen to travel with a group of friends? The Joyroom JR-CL03 car charger will be perfect for you! Equipped with up to 5 USB ports and a long cable, it allows you to charge all your passengers' smartphones comfortably - even in the back seats. The device provides a total output power of 31W and features wide compatibility.

Designed for large families

With up to 5 available USB ports, 5 devices can be charged simultaneously. The charger also offers a long cable so that rear-seat passengers can also use it without any problems. This means that the driver can comfortably use the navigation system and charge his phone, while the front passenger can also charge his smartphone. What's more, children sitting in the back will be free to play with tablets connected to the power supply.

Excellent performance

The charger offers a total output power of 31W and an amperage of up to 6.2A. As a result, no passenger has to wait too long for their phone to be charged. What's more, each port is equipped with an intelligent chip that automatically detects the connected device and adapts the charging parameters to its requirements.

Universal compatibility

The JR-CL03 is compatible with most popular devices on the market. For example, you can easily charge a smartphone, tablet, iPad, powerbank, smartwatch, digital camera or portable games console. What's more, you can successfully use the charger in 12-24V vehicles - from cars to SUVs to trucks.

Safe to use

Don't worry about damaging the charger or the devices connected to it. The JR-CL03 features a multi-level protection system against overheating, overcurrent, short circuit, overcharging, overvoltage and more. But that's not all - durable, flame-retardant ABS and PC plastics have been used for the product, and its most sensitive components have been additionally protected.

Additional features

What else makes using the charger so convenient? The device is equipped with a special clip, with which you can easily attach it to the rear seat. It also has a built-in small LED light to provide you with an extra source of light in the dark - so you can easily find everything you need in your car!
