

Bluetooth 5.3 AUX receiver Joyroom JR-CB3 (black)

Ref: 6956116725686

Bluetooth 5.3 AUX receiver Joyroom JR-CB3 (black)

Bluetooth 5.3 AUX Joyroom receiver JR-CB3 (black)

Your car radio doesn't support Bluetooth? No problem - with the Joyroom JR-CB3 receiver, you can comfortably listen to music in the car, use navigation and even talk on the phone. The device supports Bluetooth 5.3 and is equipped with 2 noise-cancelling CVC 8.0 microphones and is easy to operate with the built-in buttons. Simply connect the adapter to the radio, pair it with your smartphone and enjoy your favourite songs!

User-friendly

With Joyroom, everything you need is at your fingertips. The adapter is equipped with several buttons, with which you can switch a song, adjust the volume or handle phone calls at any time. It is also safe to use - it is protected against short circuits and overheating, among other things. The device is also distinguished by a soft LED backlight that will help you locate the buttons in the dark.

Bluetooth 5.3

Enjoy a reliable connection and fantastic sound. The receiver supports advanced Bluetooth 5.3 technology for even faster and more stable transmission, lower latency and better sound quality. You can also pair up to 2 devices with the JR-CB3 at the same time and switch between them freely. The product also allows you to play music from a memory card or equipment connected via an AUX cable.

Ideal for calls

The JR-CB3 adaptor will give you great audio quality for phone calls too. The device is equipped with 2 microphones that will record your voice perfectly. It also offers CVC 8.0 noise reduction technology and an IC filter to effectively eliminate unnecessary background noise. With Joyroom, you can be sure that you and your caller will hear each other without any problems!

Plug&Play

Don't be afraid of complicated and time-consuming device configuration. The Joyroom receiver is extremely easy to use - thanks to the Plug&Play system, all you need to do is plug it into your car radio. The 3.5mm jack connector allows for the transmission of audio signals and the USB connector is used to power the device. What's more, you only need to pair the product with your smartphone once - it will connect automatically every time.
