

## Joyroom JR-ZS299 magnetic dashboard car holder with inductive

Ref: 6956116732660

Joyroom JR-ZS299 magnetic dashboard car holder with inductive

Joyroom JR-ZS299 magnetic car cockpit mount with inductive charger (black)

Ensure complete comfort when using navigation while driving. The magnetic mount will keep your phone in place, and thanks to dual induction, it will charge it in no time. The charger offers 15 watts of power, and you can extend the telescoping arm up to 142mm to comfortably use your phone's touchscreen when needed.

### Childishly easy installation

You can easily mount the mount anywhere in the cockpit. The suction cup's nanostructure keeps the product in place for as long as you need it and leaves no unsightly marks. The mount is distinguished by its wide compatibility, and you will adjust its arms to fit a phone that falls between 4.7-6.8 inches. The inductive action of the arms ensures unparalleled stability of your device throughout the ride, regardless of conditions.

### Telescoping arm

The product features a telescoping arm, the length of which you can adjust to your preference. The maximum range is 142 mm. Such a solution will allow you to keep your phone within reach and comfortably switch music while driving, without distractions. Position your device comfortably and use your navigation or music player safely and comfortably!

### Instant charging

The Joyroom JR-ZS299 is not only a sturdy mount, but also an extremely efficient charger. The dual coils responsible for charging your devices, support the Mag Safe function. This means you don't have to give up navigation when your phone is discharging. The product instantly replenishes the energy in your smartphone with 15 watts of power!
