OneOdio ON55 microphone

Bet on professional solutions and enjoy high quality sound. OneOdio ON55 is a dynamic cardioid microphone that is perfect for a variety of situations - for example, at concerts, karaoke events or conferences. The device is equipped with a wind shield and features a solid, durable design. You'll also find a special handle and a 5-meter XLR to 6.35mm (jack) cable included.

High quality sound

If you want the best possible sound quality and clear, natural sound, the ON55 will be an excellent choice. This dynamic cardioid microphone will perfectly record your voice while minimizing unnecessary background noise. The device is distinguished by a sensitivity of about -53dB, and has also been equipped with a wind shield and a sponge for shock absorption.

Improved design

Opt for superior build quality and get a microphone that will serve you for years to come. The ON55 is distinguished by its sturdy metal casing, making it extremely durable and resistant to damage. In addition, the included cable is very durable - even repeated bending and pulling will not frighten it. Also noteworthy is the gold-plated connector, which ensures faster signal transmission.

Wide compatibility

Don't worry about compatibility issues. With an XLR to 6.35 mm (jack) cable, you can easily connect the microphone to a speaker, audio amplifier, audio mixer or DVD player. Now you can comfortably work on your next podcast episode, conduct meetings at work or host karaoke parties!

Convenient operation

The included cable is distinguished by its length of up to 5m. This allows you to enjoy greater freedom of movement - say goodbye to restrictions! Convenient operation of the ON55 model is enabled by a built-in switch. In the package you will also find a special bracket made of brass. With its help you can easily attach the microphone to a tripod, you can also freely adjust its tilt in the range of 180°.

Many applications

The OneOdio microphone will find use in many scenarios. It will be perfect for a concert or wedding, for example, and you will also find it useful for recording podcasts and interviews. It will also be a great choice for a house party or karaoke event. You will also successfully use it during various meetings and conferences.
