Oneodio A71 Brown headphones

Do you listen to music for hours and appreciate comfort? Oneodio A71 headphones will be perfect for you! The product is distinguished by a well-thought-out design, and every detail will provide you with a feeling of comfort at the highest level. Adjustable headband, swivel and incredibly soft earcups, and the ability to fold - this is just the beginning of the advantages. The headphones use 40-millimeter neodymium drivers that guarantee excellent sound quality. With the A71 you'll enjoy crystal-clear treble and deep bass. You'll find 2 cables included that will allow you to connect the headphones to almost any music source.

Excellent sound

The OneOdio A71 headphones guarantee high-quality sound, thanks to the use of 40-millimeter neodymium drivers. What does this mean? A wide frequency response that will let you hear treble tones that are clear as a teardrop, as well as incredibly moving bass that you will feel in your gut. All this makes the headphones suitable not only for everyday music listening, but also for studio work or live DJ performance!

Thoughtful design

The Oneodio A71 headphones will provide you with hours of comfort, and thanks to their thoughtful design, they will steal your heart! You can easily adjust them to your needs with the adjustable headband, and thanks to the swivel ear cups you can quickly and efficiently

discover your ear when needed. Both the headband and earcups are covered with an extremely pleasant and soft material, so even a full day of use will not cause discomfort.

Practical cables included

In the set you will find two cables that will make it easier for you to use the headphones. The 3.5 mm jack audio cable will allow you to use them conveniently with a phone or tablet, for example, and thanks to the built-in microphone you can make voice calls without having to pull out your phone. The 6.5 mm to 3.5 mm cable will allow you to connect the headphones to an amplifier, for example.
