

Water Fountain for pets Homerunpet WF20

Water Fountain for pets Homerunpet WF20

Ref: 6970834411027

Homerunpet WF20 smart dog and cat water fountain/drinker.

Do you work long hours away from home, and during that time your pet has already drunk all the water from the bowl? Do you want to avoid such situations? With the WF20 smart dog and cat fountain, this problem will disappear! The amount of water that will fit in the device is as much as 2 liters, so for one cat it will be enough for up to 7 days! You don't have to worry about it spoiling either, as the drinker is equipped with a 3-level filtration system that ensures fresh and tasty water all the time.

Fresh water

You can already forget about constantly changing your pet's water because it's dirty and full of hair. The Homerunpet drinker is equipped with a 3-level filtration system, consisting of powdered coconut charcoal sandwiched between 2 cotton nets. They prevent the water from becoming stale, provide a good taste, and also filter animal hair and dirt from the water. From now on you can be sure that your pets always drink fresh and tasty water.

The perfect drinker for dogs and cats

The Homerunpet smart drinker will be equally suitable for dogs and cats, thanks to its large tank capacity, which is 2 liters. For one cat, this amount is enough for up to 7 days, making this device ideal if you are constantly away from home. In addition, thanks to the transparent window in the drinker, you can monitor the water level, and the LED indicator on the front of the device will let you know

when the pump stops working.

Comfort of use

The Homerunpet drinker will also be ideal for larger pets due to its large water surface on top. The bowl has been tilted at an angle of 4.18, for better pet comfort, and in addition, when the unit is out of power, it can store a certain amount of electricity. This fountain will work even when there is a small level of water in the container. What's more, this equipment is very quiet (its volume level is only 20 dB) due to 20 water paths.

Intuitive operation

The operation of the Homerunpet drinker is very intuitive, and it will only take you a moment to assemble the whole structure. Through two clicks you can change modes, which are normal mode (which delivers water continuously) and intermittent mode (which delivers water every two minutes). One click will turn off the LED light, while if you want to restart the device's timer, hold down the button longer. You also don't have to worry about cleaning the Homerunpet equipment, as it is hassle-free. You can easily disassemble the entire structure and clean it freely.

Safety

Homerunpet ensures the safety of you and your pet. The base of the equipment has been programmed to turn on only when you put the dedicated pump on it. When you accidentally put your phone or keys on it, it will turn off automatically. In addition, this equipment is difficult to tip over, thanks to its non-slip feet and special design. This makes the Homerunpet fountain resistant to your pet's attacks.
