True Joyroom JR-TL11 Dual-Mic ENC Wireless Headphones (white)

The TWS Joyroom JR-TL11 headphones will give you excellent sound quality whether you're listening to music or talking on the phone. They are equipped with high-end 13mm drivers, each also has 2 built-in microphones. Their operating time reaches 6 hours on a single charge, and Bluetooth 5.3 guarantees reliable transmission. The headphones are also extremely lightweight and comfortable.

As many as 4 built-in microphones

Have you ever found yourself talking on the phone in a noisy place such as a train station, bus or supermarket? With Joyroom it will become much easier and more pleasant! The JR-TL11 headphones are equipped with 4 microphones that not only record your voice perfectly, but also reduce unnecessary background noise. Thanks to this, you don't have to worry that your interlocutor won't hear you!

Many hours of music playback

Listen to music freely at work, at home or on a trip - don't worry that the headphones will drain too quickly! The Joyroom JR-TL11 can play your favorite tunes for up to 6 hours (at 70% volume). What's more, the included case allows you to extend this time to about 21 hours. In standby mode, the headphones last about 48 hours (when connected).

Bluetooth 5.3

The Joyroom JR-TL11 use an improved Bluetooth 5.3 connection for better sound quality, greater noise immunity and more stable transmission. Forget about delays and signal problems! You are also free to use only one headphone or both at the same time - the devices will switch seamlessly.

High quality sound

Experience how good the songs you love can sound. The headphones are equipped with dynamic 13mm drivers with lightweight but large diaphragms, so they can deliver fantastic sound quality. Clear, ear-pleasing treble, rich detail and deep, powerful bass - all of which will let you discover the magic of music all over again!

Light as a feather

Listen to music for as long as you want, and don't be afraid of discomfort. The JR-TL11 headphones are distinguished by their ergonomic design, so they fit perfectly to the shape of your ears, without applying unpleasant pressure or falling out. They are also extremely lightweight - each weighs only about 3.2 g.

Touch control

Enjoy convenient access to the most important functions of the headphones. The Joyroom JR-TL11 have built-in touchpads that are convenient to use, with which you can, for example, answer a phone call, pause or resume playback, reject an incoming call and activate the Siri assistant. No more need to reach for your smartphone every time!
