

Mini TWS True Earbuds Joyroom MG-C05 (black)

Mini TWS True Earbuds Joyroom MG-C05 (black)

Ref: 6941237198990

Mini TWS True Earbuds Joyroom MG-C05 Wireless Headphones (black).

Lose yourself in the sounds of music with Joyroom. The MG-C05 wireless headphones feature 6mm drivers, which are responsible for excellent HiF-i sound quality. Their operating time reaches 5 hours on a single charge. Built-in microphones, combined with a noise cancellation system, allow you to talk almost anywhere. Bluetooth 5.2 guarantees a stable connection, and the ergonomic design of the headphones ensures comfort.

Excellent sound quality

Joyroom headphones will delight you with fantastic sound quality. They are equipped with 6-millimeter composite drivers, so you can enjoy detail-saturated HiF-i sound, as well as powerful, deep bass. Now you don't even have to leave the room to feel like you're at a concert!

Talk on the phone where you want

Conveniently make phone calls even in extremely noisy places. A crowded bus? Or are you waiting for a train at a noisy train station? Now nothing will prevent you from talking! The headphones are equipped with high-quality microphones that will reliably record your voice. They also support an intelligent noise cancellation system that eliminates unwanted ambient sounds up to 35 dB. You can be sure that your interlocutors will easily hear what you have to say to them!

Up to 5 hours of operation

Now you can listen to music continuously for up to 5 hours! The built-in battery also allows for about 3.5 hours of phone calls, and their standby time reaches up to 72 hours. Charging the headphones themselves won't take long either - they'll be ready for use again after just about 1.5 hours.

Compact design

The carefully considered design will provide you with unparalleled comfort even when listening to music for hours. Each headphone weighs just 4 grams, so you'll hardly feel that you have them in your ears. You also don't have to worry about the headphones falling out of your ears. They are also IPX5 waterproof - they won't be intimidated by raindrops or sweat during an intense workout. The compact case can be easily stowed in your backpack or pocket, and the practical lanyard makes it easy to transport.

Reliable wireless connection

Forget about interference and other connection problems. The Mini TWS True Earbuds use advanced Bluetooth 5.2, which is responsible for a stable and fast connection of up to 15 meters. What's more, you can freely use just one earbud while listening to your favorite music - now nothing stands in the way. They also stand out for their compatibility with iOS, Android and Windows.
