Wireless earphones TWS Foneng BL129, with induction charging

Wireless earphones TWS Foneng BL129, with induction charging (white)

Are you looking for headphones that will not only impress you with their sound, but are also very comfortable to wear? The Foneng BL129 will be perfect for you! Thanks to Bluetooth 5.3, they will guarantee you a stable and constant connection. What's more, you can always carry them with you thanks to their lightweight and compact design.

Wireless connection

The Foneng BL129 headphones are an innovative solution for music lovers and smartphone users who want high quality sound and comfortable use. The headphones connect to devices via Bluetooth 5.3, allowing for a stable connection up to 10 metres away.

Long operating time

One of the greatest strengths of the Foneng BL129 headphones is the music playback time, which is up to 7 hours. In addition, the headphones have a large battery with a capacity of 3.7 V / 35 mAh, allowing you to use them for longer without charging. If required, the case with the large 3.7 V / 230 mAh battery allows the headphones to be charged in as little as 1 one hour while in storage. What's more, you can easily charge the case using a USB-C cable or wirelessly.

Comfortable to use

The headphones weigh just 60 g and measure 61 × 45 × 22 mm, making them very easy to transport. It's worth noting that the BL129 offer a very comfortable and stable fit in the ear, which will keep you comfortable for a long time.
