

Orico multifunction USB 2.0 External Sound Card, 10cm

Orico multifunction USB 2.0 External Sound Card, 10cm

Ref: 6954301193272

Multifunction USB External Sound Card

The Orico is a multi-functional sound card which allows you to connect audio devices such as headphones, microphone or speakers and to control the volume in an easy and handy way. The special buttons on the casing allow you to quickly mute the sound or the microphone. Allow yourself a much better sound experience on multiple devices.

Easy installation

The device does not require any kind of additional drivers or special software to be installed. Just plug & play the device to your computer and start enjoying sound in a new dimension of quality.

Design of the device

The device has been equipped with three ports, one of which is a 2-in-1 port for a headset and microphone and two separate ports for the microphone and headphones. Buttons located on the device allow you to mute the microphone or the sounds if necessary. You can forget about the falling out headphone while watching a movie together. Now each of you can have separate headphones. Manage your sound with one device.

Wide compatibility

You can easily connect the Orico sound card to your tablet, laptop or computer. It is compatible with Windows/Mac/Linux/.

Unique design

The Orico External Soundcard has been thoughtfully designed. Buttons for easy mute and volume control allow you to manage your audio with one hand. The small size of the design allows you to take it with you wherever you go.
