

## Sunnylife Landing gear for DJI Mini 3 Pro (MM3-LG399)

Sunnylife Landing gear for DJI Mini 3 Pro (MM3-LG399)

Sunnylife landing gear lift for DJI Mini 3 (MM3-LG551)

The undercarriage boost increases the stability and safety of the drone during take-off and landing. It increases it by 28mm, and thanks to its lightweight design, it does not affect the flight of the DJI Mini 3. It does not need to be removed for storage, and the silicone pads provide cushioning and add unique style to the device.

Ref: 5905316146716

### Hassle-free operation

The solutions used in the accessory allow for hassle-free installation and removal of the product, without worrying about damaging or scratching any of the arms. The silicone strap is completely safe for our drone and durable. It does not block the vision and detection system.

### Increased elevation

The distance between the ground and the drone, is increased by 28mm, ensuring the stability and safety of the drone during landing. The legs fold outwards for a fully stable and unobstructed landing. The folding landing gear, meanwhile, allows for hassle-free transportation.
