Dash camera UTOUR C2L Pro 1440P

Ref: 0735749192869

UTOUR C2L Pro 1440P video recorder

Take care of your safety on the road. The UTOUR C2L Pro video recorder offers high 4K image quality and an advanced driver assistance system (ADAS). It also has a built-in GPS module and allows 24-hour monitoring - not only while driving, but also while parking (in combination with a separately available power adapter). You'll also find an additional rearview camera included, which allows you to capture video from both the front and rear of the vehicle.

High image quality

Don't let any detail escape you. The C2L Pro is equipped with a Galaxycore 4MP sensor and supports 4K resolution (interpolation). In addition, the built-in image processor effectively eliminates noise and vibration, and allows you to preview footage in real time. The product is also distinguished by a wide field of view, and thanks to AI-WDR technology it will perform well even in strong light. Also noteworthy are the 6 HD lens groups and F1.5 aperture, which ensures great image quality even at night.

Rear camera included

Record from both the front and rear of your vehicle. The included rear camera offers 1080p resolution and a 135° field of view. With its help you can get useful evidence if, for example, someone invades your car or a minor collision occurs while parking. The device is very easy to install - just attach it to the rear window of the vehicle. It is also possible to rotate it 360°.

Driver assistance functions

Enjoy safe driving and avoid difficult situations on the road with ease. The C2L Pro video recorder offers 4 ADAS functions - Forward Collision Warning, Headway Monitoring Warning, Urban Forward Collision Warning and Stop & GO Warning. Thanks to them, you will reduce the risk of an accident or collision, and you will also easily maintain an appropriate distance from other vehicles. The device detects objects with up to 99% accuracy, and the effectiveness of its warnings reaches 95%.

Tailored to your needs

The video recorder also allows you to adjust the sensitivity of the warning in 4 stages, so you can tailor the ADAS function to your needs. Available options include Super High (ideal for starters), High (suitable for beginners), Medium (will work in most cases) and Low (recommended for experienced drivers). What's more, the C2L Pro easily identifies many types of vehicles and supports emergency recording, so you don't have to worry about losing important evidence.

Reliable and efficient operation

A built-in 2-core processor with NPU is responsible for the efficient operation of the video recorder. Thanks to it, the device consumes much less power and can provide reliable operation even at high temperatures (up to 65°C) - don't worry about it jamming in hot weather! Bet on proven solutions and get a car camera that will not refuse to serve you in the least appropriate situation.

24-hour monitoring

The C2L Pro video recorder will allow you to take care of your vehicle's safety even 24 hours a day. All you have to do is buy a separately available power adapter, which allows the device to work continuously - even when the car is parked. While parked, the camera captures video in Time Lapse mode, and if a collision occurs, emergency recording will automatically start. The resulting footage will help you determine the perpetrator of the accident!

Smart control

Get more options and enjoy convenient control of the video recorder. Just connect your phone to the camera's Wi-Fi and use the dedicated UTOUR Go app. With it you can, for example, download recorded footage and change settings. The C2L Pro also supports voice control. Simply issue the appropriate command to take a photo or turn the sound on/off. No need to press any buttons or reach for your smartphone! Note: voice commands are only available in English.

Built-in GPS

The video recorder is also equipped with a GPS module that continuously monitors and displays information such as time, speed and geographic coordinates (longitude and latitude). This means that if an accident occurs, you can easily check its exact location and get data that will come in handy, for example, when claiming compensation.

In the box

- Video recorder
- Power cable with car charger
- Rear camera
- Rear camera cable
- Small crowbar
- Electrostatic sticker x2
- 3M adhesive sticker
- User manual
- Brand
