High-quality optical glass was used for the filters, which is characterized by high transmittance, so the quality of your photos will be even better. Vibrant, realistic colors - this is what you will gain with the Sunnylife set! The filters are also characterized by light weight, so you don't have to worry about them weighing down your drone.

ND filters 4/8/16/32

The included ND filters adjust the amount of light coming through the lens and make it easier to choose the right exposure. In addition, they improve the color saturation of your photos, making the image more vivid. They also make it possible to take original shots with special effects. They are perfect for recording on sunny days, making it easier to get the right blur.
