

Zestaw 4 filtrów ND 4/8/16 Sunnylife do DJI Mini 2 (MM-FI925)

Ref: 5905316146853

Zestaw 4 filtrów ND 4/8/16 Sunnylife do DJI Mini 2 (MM-FI925)

Sunnylife 4/8/16 ND Filter Set of 4 for DJI Mini 2 (MM-FI9256)

Sunnylife's set of 4 ND filters is ideal for DJI Mini 2 drone owners who want to get professional aerial photos and videos. Each of the filters weighs about 0.76-0.8g, allowing stable use for long flight times without additional weight. They stand out for their solid performance and will perform well in bright lighting conditions.

Gain more control over the lighting of your photos

A Neutral Density (ND) filter is a special type of filter that allows you to control the amount of light reaching the sensor, resulting in more natural colors and better exposure of photos and videos. Sunnylife filters use high-quality optical glass lenses with stable properties and high optical uniformity, which guarantees the highest image quality. With the filters, you can experiment with the shutter opening time and get great shots of night lighting or mist dancing over a flowing river. Be creative and create breathtaking footage.

High-quality performance

The multilayer film coatings used in the filters ensure high light transmission, which translates into even better image quality. As a result, Sunnylife filters will perform well in a variety of lighting conditions, both on sunny days and in conditions with less light intensity. What's more, the filters have a special oleophobic coating, are scratch-resistant, and waterproof, which means that keeping them clean and in

great shape will be no challenge at all.

Experiment with 4 ND filters

The set includes 4 ND filters: ND4, ND8, ND16 and ND32, which allow you to control your exposure in different lighting conditions. Sunnylife filters are a solid and durable solution that is sure to satisfy demanding drone users. Now your photos can be even better!
