Earphones TWS 1MORE Omthing AirFree Buds (white)

1MORE Omthing AirFree Buds headphones (white)

The AirFree Buds are wireless headphones that are designed to meet a variety of user needs. They feature 8-millimeter drivers that deliver fantastic sound quality, while built-in microphones allow you to make calls. Thanks to a dedicated app, you can customize their performance to suit your needs. Their operating time reaches up to 44 hours with the help of a charging case. They are IPX4 waterproof, and their ergonomic design guarantees dreamlike comfort.

Get more pleasure from listening to music

The headphones are equipped with dynamic 8mm drivers that allow you to play music in excellent quality. So you can enjoy deep bass, clear mids and highs, and a wealth of detail. What's more, the advanced AAC codec provides even better sound quality.

Reliable wireless connection

Forget about connection problems! AirFree Buds use the latest Bluetooth 5.3 connection, which provides fast and stable signal transmission with less power consumption. Pairing them is extremely easy - just pair them with your device once, and then they will connect automatically whenever you open the case. What's more, each handset connects to your device independently, allowing you to conveniently use both at the same time, or just one, left or right.

Low latency

1MORE hasn't forgotten about gamers either! The headphones have a special gaming mode that reduces latency to a level of 100 ms, ensuring perfect synchronization of sound effects with the image. Now no opponent will miss your attention, and you will achieve another victory!

With comfort in mind

Ensure the maximum level of comfort while listening to your favorite songs. The lightweight, ergonomic design of the headphones will make you forget that you have them in your ears. You also don't have to worry about discomfort during hours of use. They fit perfectly in your ears and won't fall out, even when you're doing intense exercise. They are distinguished by IPX4 water resistance, so they are not intimidated by raindrops or sweat. You'll also find 3 pairs of interchangeable rubber bands, so you can adjust the headphones to your needs even better.

Long runtime

Play your favorite tunes for as long as you want without worrying about the headphones suddenly running out of power. AirFree Buds can run for up to 7 hours on a single charge, and with the help of a charging case (included), you'll extend that time by an additional 37 hours! That's enough time to watch 13 movies, listen to about 528 songs or watch more than 2,500 short videos on TikTok.

Talk on the phone wherever you want

Freely hold conversations no matter where you are. The handsets have built-in microphones that reliably record your voice. They also use an advanced DNN algorithm that effectively reduces background noise. Now you can talk in a crowded shopping mall or bus without any problems - your interlocutor will surely hear what you have to tell him.

Touch control

Now you have all the most important functions of your headphones at your fingertips. AirFree Buds have built-in intuitive touch panels that make it easy for you to operate the headphones. Using them, you can pause and resume playback, manage calls or activate the voice assistant - with just a few taps! In addition, the dedicated omthing app allows you to customize the functions of the touch panels. The app also offers 6 EQ settings.
