Wireless earphones TWS EarFun Air S, ANC (white)

TWS EarFun Air S headphones, ANC (white)

Are you looking for headphones that give you great sound while being very comfortable to wear? The Earfun TW201W will be perfect for you! They guarantee you a stable connection thanks to Bluetooth 5.2 technology, and what's more, you'll be able to listen to your music for up to 30 hours! The special active noise cancelling technology cancels out noise effectively, so you can enjoy clear, crisp phone calls. With Earfun, nothing will hold you back!

Superior sound

With the latest technology, Earfun earphones bring you high quality sound. They are equipped with a stable Bluetooth 5.2 connection, which extends the connection range up to 15 metres, allowing you to move freely without losing the signal. What's more, the 10mm wool composite dynamic drivers deliver powerful, rich bass and penetrating treble and clear voice frequencies. A low latency mode of 100 ms improves the movie and gaming experience.

Built for conversations

The TW201W headphones will be perfect not only for listening to music, but also for making calls. They are equipped with active noise cancellation technology that cancels out background noise by up to 30 dB. This makes the sound clearer and cleaner during conversations. So you are sure to hear every word your interlocutor says, even on a crowded bus or in a shopping mall.

Long battery life

The Earfun headphones have been equipped with a large battery, giving them an impressive runtime of up to 30 hours - 6 hours on a single charge plus an additional 24 hours with the charger, with noise cancellation mode off, with the headphones running up to 5 hours on a single charge plus 20 hours with the charger. In addition, fast charging allows 2 hours of play after just 10 minutes of charging.

Comfortable to use

Get even more options with the dedicated EarFun Audio App. You can easily adjust the sound to your preference. Plus, the easy switching function allows you to connect to two devices at the same time, such as your mobile phone and tablet. The Earfun headphones also have IPX5 protection against sweat and water, and their ergonomic design ensures a comfortable fit in the ear. You can also activate the voice assistant, making it even easier to use the headphones.
