

Smart Door Window Sensor WiFi NEO NAS-DS01W TUYA

Ref: 6924715900650

Smart Door Window Sensor WiFi NEO NAS-DS01W TUYA

Door and window opening sensor WiFi NEO NAS-DS01W TUYA

With NEO, you can feel safer in your home. If someone tries to enter a room, the NAS-DS01W door and window opening sensor detects this immediately and sends you a notification to your phone. The device connects in the 2.4 GHz band (via Wi-Fi), so you do not need to purchase any additional gateways. It is also distinguished by its long operating time, compact, clever design and compatibility with TUYA / Smart Life.

Keep your finger on the pulse

With NEO, you will immediately know if someone has tried to enter your home by opening a door or window. The NAS-DS01W sensor will quickly detect similar activities and inform you immediately - you will receive a notification to your phone accordingly. So you have everything under control! You no longer need to worry that someone will enter your home while you are away and you won't know - with NEO, you will react in time!

Reliable connection

Forget about having to buy additional gateways or other devices. The NAS-DS01W sensor supports connection via Wi-Fi - in the 2.4 GHz band. This allows you to manage it in an even simpler and more convenient way! What's more, the 2.4 GHz protocol guarantees faster and more stable signal transmission. No more delays and poor connection quality!

Long operating time

All you need to power the sensor is a single CR2 battery, which you can easily buy in many shops. You do not need to replace it too often either. The device has a service life of up to one year (assuming you use it about 15 times a day) or two years (if you use it about seven times a day). What's more, in standby mode, the sensor can last for up to 5 years!

Superior build quality

The sensor is made of robust, flame-retardant materials, making it very durable and damage-resistant - a great investment for years to come. It also has a built-in LED indicator. It's also very easy to install and compact - it won't take up too much space or be overly conspicuous.

Even more convenient to use

Add the sensor to the TUYA / Smart Life app and gain convenient access to the most important functions, settings and notifications. Now you can manage all your smart devices from a single platform - no more switching between windows! The product is also compatible with Amazon Alexa, Google Assistant and Tmall Genie.

Brand

NEO

Model

NAS-DS01W

Colour

White

Power supply

1x CR2 battery

Battery life

Up to 2 years

Current in standby mode

10 uA

Operating time in standby mode

Approx. 5 years

Number of uses

Up to 1 year (15 uses per day), up to 2 years (7 uses per day)

Frequency

2.4 GHz

Protocol

IEEE 802.11 b/g/n

Range

Up to 45 m

Operating temperature

0°C to 40°C

Operating humidity

20-85%

Storage temperature

0°C to 60°C

Storage ambient humidity

0-90%

Dimensions

Larger module: 71 x 21 x 22 mm;

Smaller module: 40 x 11 x 11 mm;

Application

TUYA / Smart Life

Compatibility

Amazon Alexa, Google Assistant, Tmall Genie
