

Smart Water Sensor HomeKit NEO NAS-WS05BH ZigBee

Ref: 6924715900490

Smart Water Sensor HomeKit NEO NAS-WS05BH ZigBee

Smart Water Sensor HomeKit NEO NAS-WS05BH ZigBee

Protect your home from flooding. The NEO NAS-WS05BH sensor will immediately notify you of a possible water leak, so you can react in time. It is perfect for the kitchen or bathroom, for example - mount it near the washing machine, bathtub or fridge. The device is compatible with TUYA / Smart Life and Apple HomeKit. It supports the ZigBee 3.0 communication protocol and requires a dedicated ZigBee gateway (sold separately) to function properly.

Keep your hand on the pulse

Don't let an uncontrolled water leak contribute to damage to the walls, floors and appliances in your home. The NEO sensor is distinguished by its high sensitivity - it will help you avoid similar problems! Mount it, for example, next to your washing machine, bathtub, sink or fridge. In the event of a leak, you will know immediately - you will receive a notification on your phone. This gives you the opportunity to react quickly and rectify any faults!

User-friendly

The sensor is very simple to install and set up. It is powered by just 2 AA batteries, which can provide a long operating time - you don't have to change them very often. It is also possible to pair the product with other devices (ZigBee or Wi-Fi) and create smart scenes. For example, you can make it sound an alarm automatically when the sensor detects a leak!

Compatibility with TUYA and Apple HomeKit

Convenient management of the sensor is made possible by the TUYA / Smart Life app. Using it, you can check its status and whether there is a leak at any time. You will also receive push notifications. The product is also compatible with Apple HomeKit. Add it to your smart home management platform and conveniently operate all your devices from a single app!

Brand

NEO

Model

NAS-WS05BH
