

Smart Alarm Siren WiFi NEO NAS-AB02WT with Humidity Temperat

Ref: 6924715900698

Smart Alarm Siren WiFi NEO NAS-AB02WT with Humidity Temperat

NEO NAS-AB02WT WiFi Alarm Siren with TUYA Temperature and Humidity Measurement

Want to further ensure the safety of yourself and your loved ones? An alarm siren with temperature and humidity measurement can help you do that. You will never miss its signal, as it sounds at 100 dB. What's more, you'll easily connect to it via a 2.4 GHz network. It also shows wide compatibility with various devices, making its use even more convenient.

Perfect alarm

The NEO alarm siren will prove itself in many situations, as it is equipped with temperature and humidity sensors. It will notify you of all anomalies with a sound as well as a light alarm. However, you don't have to worry about missing them, as it emits a signal at 100 dB, which makes it easily cut through the sounds of a crowded market or office. Don't be afraid of a sudden power outage either. The NEO alarm siren will remember the parameters previously set in the app, and when the power is turned on, the siren will return to its normal operating state. This makes it even more convenient to use.

Convenient personalization

The NEO alarm siren was created with its users in mind, so it has personalization capabilities. Choose from 18 different sounds to customize it according to your preferences. What's more, you can power it in two ways - via a USB-mini cable or via two CR123A batteries. In the dedicated app, on the other hand, you have the option to set the preferred temperature and humidity to be in the room.

When this range is exceeded, the siren will automatically sound an alarm, even if there is no power supply.

Even more possibilities

For more convenient operation, you can control the alarm from your phone, thanks to a dedicated app. With its help, you will be in control of everything, even if you are away from home. What's more, it shows wide compatibility with systems such as Apple, Android and Windows. It can also interact with other devices, so you can easily create a Smart Home.

Fast and safe operation

NEO Siren will provide you with fast and secure operation. You'll connect to it via a 2.4GHz Wi-Fi network, which guarantees a more stable, faster and convenient use. Thus, you can easily control your device with your phone. What's more, thanks to the Plug and Play technology, the siren will work as soon as you connect it.

Easy installation and long operation

Are you worried about difficult and long installation? With NEO devices you won't be! The whole process is very quick and easy, and the small and compact size of the alarm will make it even easier. Just three steps are enough to connect to the alarm. First, connect to your Wi-Fi network, then download the app and add your device. What's more, the NEO alarm sensor is a combination of security and convenience. It supports platforms such as Tuya Smart, Amazon Alexa, Google Assistant and Tmall Genie, making it even easier and more enjoyable to use.
