

Filter ND PolarPro Variable 2-5 degrees Cinema Series for DJ

Ref: 817465023389

Filter ND PolarPro Variable 2-5 degrees Cinema Series for DJ

VND filter

The PolarPro filter series specially designed for DJI Mavic Air 2 ensures high-quality images and easy installation and removal. We can choose from 2 filters offered by the manufacturer, which are made of high-quality materials such as multilayer glass (CinemaSeries™ Glass) or aluminum, making sure the weight of the filter does not affect the work of gimbal. This set consists of 1 filter: 2-5 degrees.

Durable

PolarPro filters made of the multilayer glass and high-quality aluminum provide excellent image and safety. Lightweight construction does not burden the camera, and advanced production technology protects against glare, water, scratches, or oil. Like all PolarPro accessories, this filter is covered by Adventure Assurance™ insurance, ensuring it can withstand even the toughest adventures.
