Aigo M33 mouse

Enjoy comfortable work without tangled cables. The Aigo M33 mouse works wirelessly, guaranteeing freedom of use. The product is also distinguished by its ergonomic design and quiet operation. With a resolution of 1600 DPI, you can enjoy precision, and several modes will allow you to customize the M33's operation. What's more, the mouse supports Windows and Mac OS.

Wireless operation

Say goodbye to unsightly, tangled cables. The Aigo M33 mouse is wireless and connects to a compatible device in the 2.4G band. A USB receiver is included to help you get your device ready for use. What's more, it features a frequency of 250 Hz and provides a stable connection without interference up to 20 meters.

Comfort of use

Use the Aigo M33 and don't be afraid of discomfort or the feeling of fatigue. Thanks to its ergonomic design, the mouse provides comfort for a long time, preventing wrist pain. In addition, the ABS plastic finish makes the product pleasant to the touch.

Tailored to the user's needs

The Aigo M33 mouse provides smooth operation on a variety of surfaces, and does not generate much noise, so you can use it without

worrying about annoying noise. The resolution of 1600 DPI translates into precision performance. It also offers 2 power-saving modes - in the first one the device remains in standby mode for 1 minute, and in the second one for 30 minutes. As a result, you can be sure that it won't drain too quickly.
